

The Delta Science Center

Preserving the Delta for Future Generations

Date: February 7, 2009

Time: 9:00 AM Antioch Marina

Adults: \$20.00

Children under 16: Free

Delta Science Cruise

Highlights

- Drag the Delta floor
- Study species from the Delta
- Discover exotic and native plants

All family members are invited to be involved in the science activities scheduled throughout the cruise. Scientists from the Marine Science Institute lead the activities and show how we all affect the water in the Delta. What is an exotic plant? Are Mitten Crab good for the Delta? How do our watersheds affect our drinking water? You can assist in dragging up all sorts of fish, animals, vertebrae, dirt and silt from the Delta and look at the contents under a microscope with the scientists helping you identify species and plants and understand what it all means for the Delta.

I would like to join your cruise on the 7th.
